Berkshire Dividend Growth Strategy Disclosure Information

Berkshire Asset Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Berkshire Asset Management, LLC has been independently verified for the periods January 1, 2009 through December 31, 2018. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Notes:

1. Berkshire Asset Management is a fee-based, SEC registered advisory firm serving the portfolio management needs of personal high net worth and institutional clients. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
2. The Dividend Growth Composite contains portfolios invested in Berkshire's Dividend Growth Strategy with an equity allocation target of 90% - 100%. The Dividend Growth Strategy's primary objective is to generate a growing stream of equity income by investing in a diversified portfolio of equities with stable, high, and growing dividends. The minimum size required to be in this composite is \$300,000.
3. The benchmark is the S&P 500 Index. The index returns are provided to represent the investment environment existing during the time periods shown. For comparison purposes, the index is fully invested, does not include any trading costs, management fees, or other costs, and the reinvestment of dividends and other distributions is assumed. An investor cannot invest directly in an index.
4. Valuations are computed and performance is reported in U.S. dollars.
5. Gross returns are presented before management and other fees but after all trading expenses. Net returns are calculated by deducting actual management fees from gross returns. Returns reflect the reinvestment of dividends and other earnings. The standard investment management fee schedule is as follows: 1.00% on the first \$2 million; 0.75% on the next \$3 million; 0.65% on the next \$5 million; and 0.50% over \$10 million.
6. This composite was created in August 2016. A complete list of composite descriptions is available upon request.
7. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. It is not presented for any period with five or fewer accounts in the composite for the full year.
8. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2009 and 2010 because it is not required for periods prior to 2011. The standard deviation is not presented for 2011 because 36 monthly returns for the composite are not available.
9. Past performance does not guarantee future results.
