"Casual Friday" Commentary

### Casual Friday: "Calm After the Storm" + "Time to Fly" – June 5, 2020

Clients and advisors experienced a first half of this year to remember. COVID-19 unsuspectingly struck the US, markets experienced one of the fastest sell offs in history, the US mobilized and now markets are hovering back near all-time highs. Just catching your breath...or did you capitalize on the volatility and planning your next move?

#### What to do now with the calm after the storm?

Advisors are saying the swiftness of the downturn exposed several practice inefficiencies:

- I had way too much inventory on the books to react quickly enough for all clients"
- "Too much **non-discretionary** on the books - slowed me down"
- "Inconsistent performance due to incorrect / irregular asset allocation"
- "I need to create more scalability while maintaining customization and satisfied clients"

#### "Too Much Inventory"

Almost every advisor ends up at the same inflection point in their career. "How the heck did I end with so many tickers in my book of business!" Some may argue having a thousand tickers in a book of business is "customization", but it's likely not adding strategic "value" to your clients and it's likely not adding value to your practice. In fact, when this occurs an advisor's time and attention is often relegated to less impactful activities:

- "I have to re-study this fund or stock for my review because I'm not familiar with it"
- "How do I reallocate this position now to get this portfolio in line with my best thinking without hitting my client with huge cap gains taxes"
- "How do I create a broader and more consistent communication strategy with my clients when they're all invested in slightly different ways"

Strict inventory management is one of the keys focuses of top financial advisors. They create a limited number of investment plans for **all clients**, culminate their best ideas and they stick to it with unwavering consistency. The benefits? They always go to market (prospects and clients) with intimate knowledge of their investment process, their conviction resonates with the client and they build enormous efficiencies in their overall practice. The challenge? It's like quitting a bad habit...you will "get to it later" as other pressing matters get in the way.

Another challenge? Sometimes, appointing a money manager means capital gains taxes as the manager makes wholesale changes. To ease that pain, Berkshire has a program where our PM will harvest gains over a two year period - Call to discuss. We've helped a number of advisors think through the process and build out a plan for inventory management.

Berkshire Asset Management, LLC (Berkshire) is a fee based, SEC registered advisory firm serving the portfolio management needs of high net worth and institutional clients. Our guiding principle is a belief that success can be achieved by combining rigorous, well-crafted investment processes with an exceptional level of client service and attention to detail. Asset Management with a Difference... Diligence, Integrity and Focus. Berkshire Asset Management, Inc. was formed in 1986 as a SEC registered investment adviser. In 1999 the company was sold to Legg Mason. In 2007, senior leadership repurchased the firm, forming Berkshire Asset Management, LLC, the company built to serve you today.

#### Dividend Highlights

- Dividend growth can often provide transparent insight into a company's fundamentals and vitality.
- Dividend growth can provide an attractive stream of increasing cash flow to satisfy many financial objectives.

## “Non-Discretionary / Advisor Traded” to Outside Managers?

The biggest hurdle in transitioning a practice from advisor stock picking to outside money manager: “How do I justify this fee and investment change to my clients?” Over time we’ve helped many advisors think through this strategic decision: Shoot me an email or call to talk through Berkshire’s playbook.

Just as we see and use “specialists” for various issues/challenges in our lives, financial advisors can articulate the benefits of professional stock pickers to achieve better results and free up time to concentrate on bigger picture planning items. Advisor: “Instead of spending time deciding whether to buy Company A vs Company B or tech stocks vs. utility stocks, I will use that time to perform due diligence on a handful of money managers who do this all day, every day. We will likely achieve better results and I’ll have more time to help solve your major priorities: retirement income, insurance and estate planning.” Remember: **When you solve big problems you typically increase your probability to land big assets.**

Some other common analogies to make your point?

- Would a Primary Care Physician perform open heart surgery, or would the patient be referred to a cardiac specialist?
- Would a general contractor put the roof on a home, or would he delegate to a best in class subcontractor?

## Technology Assembly Line for Consistency, Scalability and Customization: "UMA Crusader"

The business model of being both a financial planner and a "stock picker" has become very difficult to scale in practice. Clients expect advisors to solve bigger issues in insurance, retirement, estate, executive compensation, income, asset allocation, total balance sheet and niche planning... *This is often the customization and attention clients are seeking.* Clients are finding less value in an advisors ability to pick individual stocks and or individual funds to create "customization".

**There's nothing wrong with saying - "Your investment strategy is built using a slight variation of the same investment strategies I use with all of my clients. They are my best and highest conviction ideas to help compound wealth over time."**

The good news: As client expectations change and become more demanding, technology enhancements in UMA (unified managed account) has unleashed huge advisor productivity. Those deciding to adopt the structure in practice create vast efficiencies allowing time to add client value in ways far beyond portfolio management...

- Practice efficiency
  - Broad implementation of highest conviction ideas / asset allocations
  - Quick and efficient allocation changes across all accounts
  - Automated re-balancing
- Investment selection efficiency
  - Customization of broadly diversified asset allocation
  - Open architecture to hire best in breed for asset class
  - SMAs, Mutual Funds, ETFs and alternatives available in one account
- Reporting efficiency
  - Sleeve level performance to monitor performance of funds
  - Ongoing asset allocation monitoring
  - Overlay management

Call us if you’d like to brainstorm / discuss these ideas!

*\*Morningstar Rating Morningstar Rating TM is calculated for investments with at least a three year history. It is calculated based on a Morningstar Risk- Adjusted Return measure that accounts for variation in an investment's monthly performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of investments in each category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars and the bottom 10% receive one star. The Overall Morningstar Rating is derived from a weighted average of the performance figures associated with the three-, five- and 10- year (if applicable) Morningstar Rating metrics. Morningstar will not calculate ratings for categories or time periods that contain fewer than five investments.*

*Berkshire Asset Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®). <https://berkmgmt.com/wp-content/uploads/2020/01/GIPS-Compliant-Presentation-through-2018-1.pdf> Berkshire Asset Management is a fee-based, SEC registered advisory firm serving the portfolio management needs of institutional and high-net worth clients. The Dividend Growth Composite contains portfolios invested in Berkshire's Dividend Growth Strategy with an equity allocation target of 90% - 100%. The Dividend Growth Strategy's primary objective is to generate a growing stream of equity income by investing in a diversified portfolio of equities with stable, high, and growing dividends. The benchmark is the S&P 500 Index. The index returns are provided to represent the investment environment existing during the time periods shown. For comparison purposes, the index is fully invested, does not include any trading costs, management fees, or other costs, and the reinvestment of dividends and other distributions is assumed. An investor cannot invest directly in an index. Gross returns are presented before management and other fees but after all trading expenses. Net returns are calculated by deducting actual management fees from gross returns. Returns reflect the reinvestment of dividends and other earnings. Valuations are computed and performance is reported in U.S. dollars. To receive a complete list of composite descriptions and/or a compliant presentation, contact Jason Reilly, CFP® Tel: 570-825-2600 or [info@berkshiream.com](mailto:info@berkshiream.com). Past performance does not guarantee future results.*

*Definitions: The S & P 500 Index is a market capitalization weighted index of the largest 500 U.S. stocks. It is a market-value weighted index (stock price times # of shares outstanding), with each stock's weight in the index proportionate to its market value. The index is designed to measure changes in the economy and is representative of most major industries. Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. The index was developed with a base value of 200 as of August 31, 1992. Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The index was developed with a base value of 200 as of August 31, 1992. You cannot invest directly in an index. BEst (Bloomberg Estimates) Earnings Per Share (EPS Adjusted) estimate returns Earnings Per Share from Continuing Operations, which may exclude the effects of one-time and extraordinary gains/losses. Beta is a measure of volatility vs. an index. Upside/Downside capture ratios refer to a portfolios performance as a percentage of either positive returns (upside) or negative returns (downside) vs. an index. Standard Deviation is a measure of total risk. Alpha, Beta and capture ratios are represented as calculated by Morningstar.*

*Risks: Past performance does not guarantee future results. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will either be suitable or profitable for an individual's investment portfolio. Dividends are subject to change, are not guaranteed, and may be cut. Investing based on dividends alone may not be favorable as it does not include all material risks. There is no guarantee any stated (or implied) portfolio or performance objective mentioned by Berkshire can be met. Berkshire's equity style may focus its investments in certain sectors or industries, thereby increasing potential volatility relative to other strategies or indices. The dividend strategy may include bundled services also known as a "wrap fee program". Because there is typically a low turnover in the strategy, this may be more costly for some investors. No one should assume that any information presented serves as the receipt of, or a substitute for, personalized individual advice from a qualified advisor or any other investment professional.*

*Market Commentary, Aggregate Holdings, Securities, Sectors, Portfolio Characteristics Mentioned: No statement made in this presentation shall construe investment advice. This presentation is for informational purposes only. Views, comments or research mentioned is not intended to be a forecast of future events. The mention of any security or sector is not deemed as a recommendation to buy or sell. Any reference to any security or sector is used to explain the portfolio manager's rationale for portfolio decisions or philosophy. Research or financial statistics cited regarding securities or sectors do not contain all material information about them. Any securities mentioned represent a partial list of holdings whereas Berkshire portfolios typically contain approximately 30-40 securities in percentage weightings ranging from 1-5%. A complete list of holdings from a representative account is available upon request. Overall portfolio characteristics mentioned are from a representative account deemed representative of the strategy; data may be compiled from Bloomberg, Baseline or Berkshire estimates. Individual holdings, performance and aggregate characteristics of actual portfolios may vary based on a variety of factors including market conditions, timing of client cash flows and manager discretion. This presentation contains Berkshire opinions and use of Berkshire estimates which are subject to change at any time. Berkshire employees may have personal positions in any securities or sectors mentioned. Charts, presentations or articles may be obtained from third parties and Berkshire does not guarantee their accuracy. \*Platform restrictions may apply.
